## 2.2.1 Student Registration

Table 2.1: Student Registration

| Use Case             | Student Registration                             |  |  |  |  |  |
|----------------------|--------------------------------------------------|--|--|--|--|--|
| ID                   | 1                                                |  |  |  |  |  |
|                      | This use case involves the process               |  |  |  |  |  |
| Use Case Description | of a student registering on the university       |  |  |  |  |  |
|                      | service portal to access various services.       |  |  |  |  |  |
| Actors               | Student.                                         |  |  |  |  |  |
| Trigger              | Student accesses the university service          |  |  |  |  |  |
| Trigger              | portal for the first time.                       |  |  |  |  |  |
| Pre-Condition        | Student is not registered on the portal.         |  |  |  |  |  |
| Post-Condition       | Student registered on the portal.                |  |  |  |  |  |
|                      | Student navigates to the university              |  |  |  |  |  |
| Main Scenario        | service portal. Student selects                  |  |  |  |  |  |
| Main Scenario        | the "Register" option.Student sets               |  |  |  |  |  |
|                      | up a username and password.                      |  |  |  |  |  |
|                      | If entered information is invalid or incomplete: |  |  |  |  |  |
| Extension            | Portal displays an error message. Student        |  |  |  |  |  |
| EVICTIBIOII          | revises the information and resubmits            |  |  |  |  |  |
|                      | the form.                                        |  |  |  |  |  |

### 2.2.2 Quiz and Mid retake

Table 2.2: Quiz and Mid retake

| Use Case             | Quiz and Mid retake                              |  |  |  |  |
|----------------------|--------------------------------------------------|--|--|--|--|
| ID                   | 2                                                |  |  |  |  |
|                      | This use case involves a student                 |  |  |  |  |
| Use Case Description | requesting a retake of a quiz                    |  |  |  |  |
|                      | or midterm exam                                  |  |  |  |  |
| Actors               | Student.                                         |  |  |  |  |
| Trigger              | Student decides to request a retake.             |  |  |  |  |
| Pre-Condition        | Student is logged in and enrolled in the course. |  |  |  |  |
| Post-Condition       | Application submitted succesfully.               |  |  |  |  |
|                      | Student navigates to the course page.            |  |  |  |  |
| Main Scenario        | Student selects the option to                    |  |  |  |  |
| Wall Scellario       | request a retake for a specific                  |  |  |  |  |
|                      | quiz or midterm.                                 |  |  |  |  |
| Extension            | If the request is rejected: Portal notifies      |  |  |  |  |
| EVICTIBIOII          | the student with the reason for rejection.       |  |  |  |  |

## 2.2.3 Medical leave Application

Table 2.3: Medical leave Application

| Use Case             | Medical leave Application                   |
|----------------------|---------------------------------------------|
| ID                   | 3                                           |
| Use Case Description | This use case involves a student            |
| Ose Case Description | submitting a medical leave application.     |
| Actors               | Student.                                    |
| Trigger              | Student decides to apply for medical leave. |
| Pre-Condition        | The student is logged in on the portal.     |
| Post-Condition       | Application Submitted Successfully.         |
|                      | Student selects the option to               |
| Main Scenario        | apply for medical leave.                    |
| Wam Scenario         | Student attaches relevant medical           |
|                      | documents if required.                      |
|                      | If additional documentation is required:    |
| Extension            | The portal notifies the student to          |
|                      | submit the necessary documents              |

## 2.2.4 Student Application Status Check

Table 2.4: Student Application Status Check

| Use Case             | Student Application Status Check                                |  |  |  |  |  |
|----------------------|-----------------------------------------------------------------|--|--|--|--|--|
| ID                   | 4                                                               |  |  |  |  |  |
|                      | This use case allows                                            |  |  |  |  |  |
| Use Case Description | students to view the status of their submitted                  |  |  |  |  |  |
|                      | applications on the portal.                                     |  |  |  |  |  |
| Actors               | Student.                                                        |  |  |  |  |  |
| Trigger              | Student accesses the application status section.                |  |  |  |  |  |
| Pre-Condition        | Any application should be submitted.                            |  |  |  |  |  |
| Post-Condition       | Application status checked.                                     |  |  |  |  |  |
|                      | Student logs into the portal. Student                           |  |  |  |  |  |
| Main Scenario        | navigates to the "Application Status" section.                  |  |  |  |  |  |
| Walli Scenario       | The Portal displays a list of the student's submitted           |  |  |  |  |  |
|                      | applications along with their current statuses.                 |  |  |  |  |  |
|                      | If an application's status changes: The portal                  |  |  |  |  |  |
|                      | updates the status based on admin/HOD                           |  |  |  |  |  |
| Extension            | decisions. A student is notified of the updated status. Student |  |  |  |  |  |
|                      | revises the information and resubmits                           |  |  |  |  |  |
|                      | the form.                                                       |  |  |  |  |  |

## 2.2.5 Grade Improvement Application

Table 2.5: Grade Improvement Application

| Use Case             | Grade Improvement Application                            |  |  |  |  |  |
|----------------------|----------------------------------------------------------|--|--|--|--|--|
| ID                   | 5                                                        |  |  |  |  |  |
|                      | This use case involves a student submitting an           |  |  |  |  |  |
| Use Case Description | application to improve their grades for a specific       |  |  |  |  |  |
|                      | course.                                                  |  |  |  |  |  |
| Actors               | Student.                                                 |  |  |  |  |  |
| Trigger              | Student decides to apply for grade improvement.          |  |  |  |  |  |
| Pre-Condition        | Must to graded before.                                   |  |  |  |  |  |
| Post-Condition       | Application submitted.                                   |  |  |  |  |  |
|                      | Student navigates to the "Grade Improvement"             |  |  |  |  |  |
| Main Scenario        | section. Student selects a course for which they         |  |  |  |  |  |
| Wall Scenario        | want to improve their grade. Student submits             |  |  |  |  |  |
|                      | the application for grade improvement.                   |  |  |  |  |  |
|                      | If the grade improvement application is rejected:        |  |  |  |  |  |
| Extension            | Portal notifies the student with the reason for          |  |  |  |  |  |
| EVICTIPION           | rejection. Student revises the information and resubmits |  |  |  |  |  |
|                      | the form.                                                |  |  |  |  |  |

## 2.2.6 Student Application Review

Table 2.6: Student Application Review

| Use Case             | Student Application Review                                |
|----------------------|-----------------------------------------------------------|
| ID                   | 6                                                         |
| Use Case Description | This use case involves a student reviewing                |
|                      | and editing their previously submitted applications       |
|                      | before they are reviewed by administrators or HODs.       |
| Actors               | Student.                                                  |
| Trigger              | Student accesses the application review section after     |
|                      | submitting an application.                                |
| Pre-Condition        | Application should be filled and proceeded.               |
| Post-Condition       | Application submitted.                                    |
| Main Scenario        | The student navigates to the "Application Review"         |
|                      | section. The portal shows the details of the application. |
|                      | Students can edit or update the application details. The  |
|                      | student submits the edited application for re-review.     |
| Extension            | If the application is already under review: The Portal    |
|                      | displays a message indicating that changes cannot         |
|                      | be made while the application is being reviewed.          |

## 2.2.7 Admin/HOD Approval of Student Applications

Table 2.7: Admin/HOD Approval of Student Applications

| Use Case             | Admin/HOD Approval of Student Applications                        |
|----------------------|-------------------------------------------------------------------|
| ID                   | 6                                                                 |
| Use Case Description | This use case involves administrators                             |
|                      | and HODs reviewing and making decisions                           |
|                      | on various student applications submitted                         |
|                      | on the portal.                                                    |
| Actors               | Administrator, Head of Department (HOD) .                         |
| Trigger              | An application for course registration,                           |
|                      | quiz/retake, or medical leave                                     |
|                      | is submitted by a student.                                        |
| Pre-Condition        | An application has been submitted by a student.                   |
| Post-Condition       | Application Accepted/Rejected                                     |
| Main Scenario        | Admin/HOD logs into the portal.                                   |
|                      | Admin/HOD navigates to the "Applications" section.                |
|                      | The Portal displays a list of pending applications.               |
|                      | Admin/HOD selects an application to review.                       |
|                      | Portal shows the details of the application,                      |
|                      | including student information and reasons.                        |
|                      | Admin/HOD approves or rejects the application                     |
|                      | based on the provided information.                                |
|                      | If approved, portal updates the status                            |
|                      | of the application and notifies the student.                      |
|                      | If rejected, the portal updates the status,                       |
|                      | notifies the student, and may require adding a rejection reason.  |
| Extension            | If more information is required, the portal notifies the student. |
